Canadian National Plans Summer Passenger Service

The management stated that they "will make one further effort during the vacation season of 1961 to see what can be done to eliminate loss in operation."

"The Canadian National Railways will bend every effort to promote these trains and encourage the traveling public to use them by such methods as advertising, special incentive fares and improving quality of service."

did not require as much time
and labor as has been the main-
tenance.

Servicing the Slopes this year
is a 1,000 foot T-Bar Lift which
was installed by the
Cross Brothers with technical
advice obtained from the agent
selling the Lift. The Bro-
thers are quite pleased that
they decided on purchasing
their Lift from the Hall Com-
pany for they have had no
break-down since it began op-
erating in December, and also
the fact the public have ex-
pressed how easy it is to use.

An additional attraction for
the area has been the Ski
School under the able and tal-
ented Ken Lasseter, Ski Pro
from Ontario, Canada. Lasseter
is a member of the Canadian
Ski Instructor Alliance and
has proved his ability with his
pupils while teaching a mod-
ified version of Austrian Meth-
od of Skiing. Next year plans
are in the making for organiz-
ing a Ski and Outing Club
which will benefit both the
area and the public.

Encouraged by the fact that
Mt. Abram was the second
area to open first to the pub-
lic this winter plus the fact it
being their first year in the
skiing business, and fortified
by the success of the rest of
the winter, the Cross Brothers
definitely have plans for expan-
sion.

The heavy growth for two
new trails has already been re-
moved and also the line for a
new and larger T-Bar lift. The
two new trails which will be a
three-quarter of a mile expert
trail and a mile long intermedi-
ate trail have to be groomed.
From all reports the expert
trail will definitely require
expert skiing talent therefore
offering great challenge.

The longer T-Bar when in-
stalled will not be an extension
of the T-Bar now in operation
but an entirely new and sepa-
rate one extending from the
base to the top of the mountain
covering 3,350 feet. This will
service the new trails, while
the present 1,000 foot T-Bar
will continue to service the no-
vice area.

Improvements inside the
Lodge will mainly be in the
Sports Shop where more equip-
ment is planned to be available
for sale—also more rentals.

During the summer season
beginning this year the Cross
Brothers plan to use their fac-
ilities and area for tenting.
Tenting, a new family sport,
is fast becoming the means by
which the average family can
travel around the countryside
at a minimum expense.

Bearing in mind that with ex-
pansion comes the increase in
cost. However the public
need not worry too much for
the seasonal ticket rates will
not be too drastically increas-
ed. Rates on the present T-Bar
Lift will be the same as this
year while the rates for the
new T-Bar Lift will be com-
parable to other areas.

This entire expansion pro-
gram outlined for Mt. Abram
by the Brothers Three indeed
proves their desire to prove
that Maine people can adapt
their rugged terrain and rug-
ged weather to make it advan-
tageous for all.

THE WORLD'S MOST WIDELY USED DEVOTIONAL GUIDE

Thursday, April 6

Read Matthew 28:1-8
Fear not ye: for I know that
ye seek Jesus, which was cruci-
fied. He is not here: for he is
risen, as he said. Come, see the
place where the Lord lay.
(Matthew 28:5,6.)

During the dark days of
World War I, Air Pilot Smith,
now Bishop Angell Smith, heard
Harry Lauder, the great singer
of Scotland, when he sang to
1100 officers and men at a chap-
el service at a camp in Ark-
ansas.

Before singing, Harry Lau-
der said: "Comrades, my son,
my only child, was killed in
battle two years ago. My heart
was crushed. I said I would
never sing again. I looked down
the road to dissipation to kill
my grief.

"Then I decided to travel a
road that was to lead me up a
hill. I found it a rough and
rugged road, but I traveled it

to the end. There I found the
grave of my son and a cross up-
on it. There my burden of sor-
row was lifted, and I received
new hope and the impulse to
sing again.

"Now I can sing with more
assurance than ever before, for
I know that because the one
who died on the cross of Cal-
vary lives, my son also lives,
and someday I shall see him
again."

That is the Easter message.
PRAYER: Our Father, we
thank Thee for Thy redeem-
ing love, which, through Thy
Son who suffered, died, and
rose from the dead, saves us
from sin and death. In His
name we pray. Amen.

COUNTRY FLAVOR

WOODLAND MESSAGE
Uncharted frontiers lie over
the horizon; sources of unbe-
lievable power are waiting. Tu-
mult, greed and ruthlessness
are rampant in the world.
Where can a man find the veri-
ties that assure serenity along
the trail of years?

Go to a peaceful woodland
where great trees lift arms to
the sky and branches wear a
garland of green. Among the
steadfast trees, a man can
glimpse the faith that governs
our flowering world.

A century or more ago a seed
fell on good soil; a small white
root struck downward; a slender
green spike began climb-
ing toward the sun and stars.
Through the years the tree

grew in stature and strength.
It has known the miracle of
spring, the benediction of sum-
mer, the glory of autumn and
the tempests of winter.

In a quiet woodland the per-
plexed heart can find reassur-
ance. Arched branches and tall
trunks remind one of cathedral
aisles. There are still verities
in our world; there is still ab-
iding faith. Man creates com-
plex systems to govern his so-
cial order; he discovers new
principles of matter that open
unknown vistas. That is part
of man's instinctive, never-
ceasing struggle for a better
world.

But there come times in a
man's life when he needs to
pause in the midst of turmoil
and to seek a sanctuary. In a
quiet woodland one can re-
establish contact with faith.

NORTH OXFORD MENTAL HEALTH ASSOCIATION TO BE FORMED MONDAY

Interested residents in the
North Oxford County Area
will gather Monday evening
April 10 at the Rumford Me-
chanics Institute, at 7:30, to dis-
cuss the needs for, and the
ways and means of, establish-
ing a Mental Health Associa-
tion for the North Oxford
County Area.

Julian Israelson, of Rum-
ford, will be temporary chair-
man of the meeting, which will
hear information from resi-
dents from Dixfield, through
Bethel as to the incidence, the
need, and the methods to be
used in establishing the Asso-
ciation.

Much concern over the es-
tablishment of community
programs in the Mental Health
field was evidenced by the re-
cent hearings of the legisla-
ture. Among the points brought
out were the concern of incom-
ing industrial and government-
al establishments with having
such movements and programs
in Mental Health going on in

National Flower, to our head-
master.

A program to be held before
the Extension Group next week
is being planned by several F.
H. A. girls.

During the past few weeks,
the Gould Future Homemakers
of America Chapter has been
making plans for observing
this week. Displays portraying
the purposes and activities of
our organization and the values
of home making will be in the
Gould, Crescent Park, and
town libraries, Gould study
hall, Brown's Variety Store
and the Home Economic Cot-
tage to acquaint others with
FHA.

During this week, girls from
the chapter will be on call to
do any "free work," such as
babysitting, light housework or
any other errands you would
like done. So call Vandyke
4-2401 if you have some service
you would like done or if you
know of something the FHA
girls could do for someone free
of charge!

DRIVERS—DEVOTE YOUR ATTENTION TO DRIVING

"We all hope that the long,
hard winter is behind us," the
Maine Highway Safety Com-
mittee observed today. "With
the arrival of spring, warmer
weather, and Daylight Saving
Time, more and more motorists
will be on the road during ear-
ly evening hours from now on."

The safety committee pointed
out that drivers will have a
natural tendency to relax and
to enjoy the scenery on these
evening trips, and they issued
a warning about inattention be-
hind the wheel.

"A split second spent admiring
the beauty of the Maine
countryside could spell disaster
for a driver," the committee
added. "Today's traffic de-
mands constant concentration
on the part of every driver."

"Any driver who wishes to
gaze at the scenery will do well
to find a safe parking spot—
well off the highway," contin-
ued the committee. "His enjoy-
ment of the scene will be in-
creased by the realization that
he is in no way contributing to
a possible motor vehicle acci-
dent."

"There is a natural tendency
to relax our vigilance, now that
better weather has arrived,"
concluded the committee. "We
must be conscious of this ten-
dency and we must make cer-
tain that we do not allow it to
lead us into trouble on the
highway."

The Go-Power Progress and Plans at Mt. Abram

By C. Bickford

Adventuring into the field of
"owning one's own business"
is not new for Norton, Stuart
and Donald Cross of Bethel.
These Brothers have had the
getup and go-power since they
were youngsters. About seven
years ago they merged into the
lumbering and wood cutting
business taking over the con-
trols shortly after the death
of their father.

Over a period of years the
Brothers Three have acquired
woodland acreage and heavy
equipment necessary for their
type of business. Each of them
have proved their ability not
only for their good business
sense of management but also
with their know-how of the
business end of handling
power tools or the old fashion
ax. Their success is due to
greatly to the fact that they all
share their burden of work and
sincerely work together as a
team overlooking minor or pet-
ty grievances which tend to
hamper many who attempt to
open a business. The Brothers
are fortunate to have as wives,
three ladies who not only are
steadfast friends but work cor-
dially together helping in any
manner possible whatever un-
dertaking the men attempt.

To have a ski area was a
dream shared by the Brothers
at an early age. Since all three
have an "outdoor interest" in
sports, mainly hunting and
fishing, thoughts of skiing in-
trigued and interested them no
end. None of them however
had seriously entertained
thoughts of a ski area until one
day Norton and Donald had to
snowshoe over Mt. Abram to
some woodland they owned
where a tractor was mired.

While climbing up the moun-
tain side they took note of the
prospects of it being an excel-
lent site for several ski trails.
At the summit they viewed the
cascades for the Lift and
Lodge at the base of the moun-
tain which would be located
near the paved road. With all

this in mind the Brothers Three
set about acquiring the remain-
ing part of the mountain neces-
sary for their new enterprise
and also acquired all ski areas in
their free time to learn the
pro's and con's of such a busi-
ness. They sought advice from
Lawyer Joe Margolin, Norway,
and also from Ben Pike who is
associated with the Maine De-
velopment Commission. They
joined the Maine Ski Council
and took First Aid Courses on
Ski Patrolling.

However, thru the thick and
thin of it the Cross Brothers
took two of their lumbering
crew plus themselves, cleared
the area of wood, carefully
grooming the slopes to use this
first year not only freeing it of
trees, underbrush and stones
but also placing at least 50
tons of hay on it for a base.
Donald, the Treasurer and Sec-
retary of the group, drew the
plans for the Lodge locating it
at the base of the mountain but
with a view of the slopes and
easy access to the parking lot
and highway. The Lodge was
made ample enough for cafe-
teria with picnic size tables
and benches and fireplace up-
stairs, and with an area for a
sport shop, Baby Sitting Room,
First Aid Room, and Rest Room
facilities along with the fur-
nace and storage room in the
basement. This was completed
by the Cross Brothers, their
wives, and crew just a few
months prior to opening of the
area.

Mrs. Gladys Cross—mother
of the three brothers and bet-
ter known as "Mom" Cross—
certainly deserves great credit
for standing by her sons in
times of need. "Mom" Cross
helps tend the cafeteria and
baby sits in the Lodge, as well
as being on hand to give ad-
vice when asked.

To make the area unique as
well as a well-rounded family
one for which Mt. Abram is
known, Norton, Stuart and
Donald decided to have both a
skiing rack and toboggan or
sled run. To provide for these

ADDITIONAL FHA FUNDS AVAILABLE FOR FARMERS

Additional funds have been made available to help meet the needs of eligible farmers who need operating money to carry out their farming operations. Elwyn R. Morrow, county supervisor for the Farmers Home Administration announced.

Mr. Morrow said that a \$35,000,000 contingency fund provided by the 1961 Agricultural Appropriations Act has just been released to the Farmers Home Administration to meet the growing demand for credit.

This move was taken by the U. S. Department of Agriculture, Mr. Morrow said, in an effort to make certain, within the authorities and funds available, that no qualified family-type farmer will be required to give up farming because of his inability to finance his 1961 operations.

Because of high operating costs and unfavorable margins of profits many farmers have exhausted their regular sources of farm operating credit. The amount of operating loans made so far this year by the Farmers Home Administration totals 20 percent higher than last year. The credit Agency's biggest lending season lies just ahead as farmers prepare to start their spring work.

Most of the applications so far this year are for loans to buy feed, machinery, poultry, cattle, fertilizer, and building repairs. Some applications have also been received for refinancing farm debts.

The Farmers Home Administration makes operating loans primarily to help eligible farm families make improved use of their land and labor resources on family-type farms and make needed changes in their farm-

Good Values In Textile Stocks

Frequently the best time to buy certain groups is when they are most unpopular. The writer feels that perhaps we have reached the point where the unpopular textile stocks are worth a review. Many of these are selling considerably below their highs of the past couple of years. In many cases yields offered are 5% or greater and the stocks are selling around 10 times 1960 earnings, quite a bargain in this high flying stock market.

Admittedly the textile business has been deteriorating for the past year and there is some question whether 1961 results will measure up to those of 1960 but there are indications that the textile industry will turn the corner in 1961. It may be safe to assume that the worst for the industry has been discounted in the price of these stocks.

Probably the investor will be on much safer ground if he purchases textile stocks with the objective of income rather than capital gains. For what he may sacrifice in capital gains potential could be offset by the degree of security in holding a sound value in the event of a sharp general decline in the stock market. Furthermore it has been our experience that stocks eventually find their true market value and if the general stock trend remains at its present level or turns up again holders of textile stocks might be in for a pleasant surprise.

The stocks we recommend are: Burlington Industries, J. P. Stevens, Lowenstein, Dan River Mills, Cone Mills and United Merchants & Manufacturers.

SELF-EMPLOYMENT TAX FOR FARMERS

Most farmers must pay a Federal self-employment tax for 1960, Whitney L. Wheeler, District Director of Internal Revenue for Augusta District, reminded them today.

He said the rate of self-employment tax for taxable years beginning in 1960 is 4½ percent, and is in addition to any income tax payable.

Under the Federal Social Security law, Mr. Wheeler said, Social Security taxes are paid by employees and their employers, and self-employment tax must be paid by persons who are self-employed. These taxes are used to pay old-age, survivors and disability benefits under the Federal Social Security program, he said.

Mr. Wheeler explained a self-employed person is one who operates his own business, and that a farmer who operates a farm, either on his own land or land rented from someone else, is therefore considered self-employed. This is true, he said, even though he may employ someone else to do the farm work and does not live on the farm himself.

Mr. Wheeler reminded farmers they must file Federal income tax returns and pay any self-employment tax due, even though they owe no income tax.

Ordinarily, he added, no self-employment tax is due unless net earnings from self-employment amount to \$400 or more for the year.

However, he continued, farmers who have actual net earnings from the operation of their farms of less than \$400 may, under certain circumstances, elect to pay the self-employment tax and may qualify to receive benefit under the Social Security system.

WOMEN'S FELLOWSHIP

The Women's Fellowship will meet Wednesday evening, April 12, at 6:30. A pot-luck supper will be served by the members of Circle 5. Each member is requested to bring her own place setting. The evening's program will include dedication services for both the "Women's Gift Boxes" and the "Friendly Service Quota."

A Senator tells us the average American is not tax conscious yet, and this is doubtless so. If he shows any sign of coming to, he is struck by another.

LEAVE THE LAWN ALONE FOR GREENER GRASS

Magazine Reports Diseases Result From Over-Fertilizing, Excess Water. Good lawn management, for greener, healthier grass, consists in large part of leaving the lawn alone, especially during spring and summer months, according to Changing Times, the Kiplinger Magazine.

A copyrighted article in the current issue of the magazine notes that most lawn diseases are caused by fungi which thrive on grass that has grown fast and become succulent and therefore weak, and which thrive also in a warm humid atmosphere. "When the grass is heavily fertilized in the spring and forced to grow fast and lush, just at a time when the weather warms and the air becomes humid, then disease makes its greatest inroad," the magazine states.

The editors point out that disease seldom wipes out a whole lawn overnight, "but it does make a mess out of millions of lawns every year. It is helped by two human errors. First, most people mistake disease for drought. Second, frequent fertilizing and watering, which you might expect would strengthen the grass, actually makes it susceptible to disease when done at the wrong time of year."

Mr. and Mrs. Harold Churchill and Mrs. Nellie Martin entertained Mr. and Mrs. Joseph

Quoting experts from the U. S. Agricultural Research Service at Beltsville, Md., the editors give the following program for spring lawn care:

(1) A light application of fertilizer. It might take the form of an organic or a slow-releasing fertilizer that would not give the grass such a sudden shot in the arm as heavier fertilizing, which should be reserved until fall.

(2) The cool-weather grasses are strengthened by mowing them tall—at a height of around two inches. Cutting them shorter removes too much of the leaf and shocks and weakens the plants.

(3) To prevent the high humidity that promotes fungus growth, avoid light, frequent sprinklings, especially in the evening when the sun is not out to dry the air. Actually, it is best not to water at all except in the case of severe drying. Most lawns on average soil will go for three or four weeks without rain. When the critical times comes the grass will acquire a bluish cast and footprints will persist as the leaves fail to spring back. At this point one heavy soaking is advisable.

(4) The lawn should be kept clean and free of heavy clippings. These, lying thick on top of the blades, trap warm, moist air beneath and form a hot-house for fungi.

The advice is good, the editors conclude, "first, because it comes from experts, and second, because it's probably the only instance on record where the homeowner can improve things by taking it easy."
